Plymouth State University Factbook
Annual Unduplicated Headcount and Credit Activity

Definitions:

Through 2002-2003, headcount is obtained from R+30, end of term, and transcript records and is unduplicated. All students are counted who were either confirmed and registered for credit on R+30 or at end of term, or who had records posted to the transcript. Beginning 2003-2004, headcount is obtained from valid registrations that produce a transcript record and is unduplicated. Terms include Fall, Spring, Winterim, two Summer Sessions, and the General Session (year-long).

Credits earned are obtained from transcript records for passed, credit-bearing courses (excludes AF, AU, AW, F, IC, NG, NP, and W grades).

Through 2002-2003, credits registered are obtained from the maximum registered credits recorded at R+30, end of term, or posted to transcript, whichever is greater (i.e., dropped credits are included if a record of them is available). R+30 records are available only for Fall and Spring semesters. End of term records are available for all terms. Beginning 2003-2004, credits registered are obtained from valid registrations that produce a transcript record. Audits are omitted.

Through 2002-2003, the degree status of undergraduate students is based first on spring, then on fall semester if they attended either. The degree status of graduate students is based on the last term enrolled, including summer terms. Beginning 2003-2004 the degree status of all students is based on the last term enrolled.

*2000-2001 counts corrected September, 2002.

** 2003-2004 counts corrected March, 2005
