

Plymouth State University Factbook

Completions of Bachelor Programs, Options, & Certifications

Counts each major and option completed. Programs with options are shaded. Programs discontinued in the most recent academic catalog are in italics. Because students may have two majors with as many as three options each, the number of program completions exceeds the number of degrees awarded. On average, about three students per year have two majors, but more than one option is common. Beginning 2002 students can add programs to an existing degree. These are counted as completions but not as new degrees.
