Key Inspirations

Take – Away - Reccs

• Ethic runs across themes (leadership + innovation seems to as well service)

• Societal change this too nebulous, really across clusters.

• Make these broad concepts integrated in Fys + curriculum.

• Projects could be 1 credit modules or capstone.

• Clusters could be a how to study/address these broader questions that could then provide info to other clusters. Ie societal change some may study how to change society in general + share w/ other clusters who would then enact societal change in their context.

• What’s the outcome of the cluster, what evidence, competences j certificates, badges, portfolios?

• How to manage tension (potential) of what students need (from H.E perspective) w/need of business partners.

• How to assess clusters/projects from stand point of all stallholders.

• Organically involve students in process of defining projects/clusters.

• Value in bringing to gather people from across campus fun too!
