Total Quarantining Outside of NH: 28 (Including 2 travel quarantine)
Total Isolating in New Hampshire: 10
Total Isolating Outside of New Hampshire: 3
PSU Isolation/Quarantine Beds in Use: 20 (70 beds available)

Notes:

- An Active Case is defined as a person who is COVID-19 positive and is within their 10-day isolation period.
- Quarantine refers to the practice of separating individuals who have had close contact (see definition of close contact below) with someone with COVID-19 to determine if they develop symptoms or test positive for the disease. Quarantine lasts for a total of 14 days after the exposure has ended.
- Isolation is a term used for an individual who tests positive for COVID-19. Isolation keeps someone who is sick or tested positive for COVID-19 without symptoms away from others even in their own home.
- Close Contact is defined as any individual who was within 6 feet of an infected person, masked or unmasked, for at least 10 minutes starting from 2 days before the illness onset (or, for asymptomatic patients, 2 days prior to positive specimen collection) until the time the patient is isolated.
