PSU COVID-19 Status and Summary
Thursday, October 1, 2020

TESTING

Testing Results from Week of September 28, 2020

Number of tests performed this week: 3527
Results Received to Date (as of 10:50 a.m. on 10/01): 2298
Total New Positive Cases: 1 (received separately from Quest)
  Students: 0
  Employees: 1
Results Pending: 1299

Total New Positive Cases since Monday, September 28, 2020
  Students: 0
  Employees: 1

Total Active Cases: 1

QUARANTINE & ISOLATION

Total Quarantining in New Hampshire (including 2 travel quarantine): 6
Total Isolating in New Hampshire (positive cases): 0
Total Isolating Outside of New Hampshire (positive cases): 0
PSU Isolation/Quarantine Beds in Use (88 beds available): 2

NOTES:

- An active case is defined as a person who is COVID-19 positive and is within their 10- day isolation period.
- Quarantine refers to the practice of separating individuals who have had close contact (see definition of close contact below) with someone with COVID-19 to determine if they develop symptoms or test positive for the disease. Quarantine lasts for a total of 14 days after the exposure has ended.
- Isolation is a term used for an individual who tests positive for COVID-19. Isolation keeps someone who is sick or tested positive for COVID-19 without symptoms away from others even in their own home.
- Close Contact is defined as any individual who was within 6 feet of an infected person, masked or unmasked, for at least 10 minutes starting from 2 days before the illness onset (or, for asymptomatic patients, 2 days prior to positive specimen collection) until the time the patient is isolated.
