PSU Isolation/Quarantine Beds in Use: 9 (81 beds available)

Long-Term Statistics
Total Results Received: 27662
Positive Cases Since 7/29/20: 36
Overall Positivity Rate: 0.13%
Individuals Contacted by R.R. Team: 811

Notes:

- **An Active Case is defined as a person who is COVID-19 positive and is within their 10-day isolation period.**
- **Quarantine refers to the practice of separating individuals who have had close contact (see definition of close contact below) with someone with COVID-19 to determine if they develop symptoms or test positive for the disease. Quarantine lasts for a total of 14 days after the exposure has ended.**
- **Isolation is a term used for an individual who tests positive for COVID-19. Isolation keeps someone who is sick or tested positive for COVID-19 without symptoms away from others even in their own home.**
- **Close Contact is defined as any individual who was within 6 feet of an infected person, masked or unmasked, for at least 10 minutes starting from 2 days before the illness onset (or, for asymptomatic patients, 2 days prior to positive specimen collection) until the time the patient is isolated.**
