COVID-19 Status and Summary

February 3, 2021

Testing Results from Week of January 31, 2021
Number of tests performed this week: 1802 and Ongoing
Results received Broad this week: 1802
Test Not Processed (TNP/INC) Broad: 38 and Ongoing
Results received outside of Broad: 102
Total tests received this week: 1904 and Ongoing
Broad test results turnaround time: <24 hours

Results pending from Broad: 0
Total Active Cases: 45

Total New Active Positive Cases since Sunday, January 31, 2021 at 12:00 AM
Students: 21
Employees: 1

Current Quarantine and Isolation Status
Total quarantining in New Hampshire: 62 (including 3 travel quarantine)
Total quarantining outside of New Hampshire: 11
Total isolating in New Hampshire: 36
Total isolating outside of New Hampshire: 15
PSU isolation/quarantine beds in use: 35 (74 beds available)

Long-Term Statistics
Total results received: 45016
Positive cases since 7/29/20: 313
Overall positivity rate: 0.69%
Individual contacts by R.R. Team: 1381

An Active Case is defined as a person who is COVID-19 positive and is within their 10-day isolation period.

- Quarantine refers to the practice of separating individuals who have had close contact (see definition of close contact below) with someone with COVID-19 to determine if they develop symptoms or test positive for the disease. Quarantine lasts for a total of 10 days after the exposure has ended.
- Isolation is a term used for an individual who tests positive for COVID-19. Isolation keeps someone who is sick or tested positive for COVID-19 without symptoms away from others even in their own home.
- Close Contact is defined as any individual who was within 6 feet of an infected person, masked or unmasked, for at least 10 minutes starting from 2 days before the illness onset (or, for asymptomatic patients, 2 days prior to positive specimen collection) until the time the patient is isolated.
