COVID-19 Status and Summary

February 4, 2021

Testing Results from Week of January 31, 2021

Number of test performed this week: 3236 and Ongoing
Results Received Broad this week: 1820
Test Not Processed (TNP/INC) Broad: 56 and Ongoing
Results Received Outside of Broad: 133
Total Tests Received this week: 1925 and Ongoing
Broad Test Results Turnaround Time: <24 hours

Results Pending from Broad: 1506

Total Active Cases: 43

Total New Active Positive Cases since Sunday, January 31, 2021
Students: 21
Employees: 1

Current Quarantine and Isolation Status
Total Quarantining in New Hampshire: 60 (including 3 travel quarantine)
Total Quarantining Outside of NH: 11
Total Isolating in New Hampshire: 29
Total Isolating Outside of New Hampshire: 14
PSU Isolation/Quarantine Beds in Use: 35 (74 beds available)

Long-Term Statistics
Total Results Received: 45062
Positive Cases Since 7/29/20: 362
Overall Positivity Rate: 0.80%
Individual Contacts by R.R. Team: 1387

An Active Case is defined as a person who is COVID-19 positive and is within their 10-day isolation period.

- Quarantine refers to the practice of separating individuals who have had close contact (see definition of close contact below) with someone with COVID-19 to determine if they develop symptoms or test positive for the disease. Quarantine lasts for a total of 10 days after the exposure has ended.
- Isolation is a term used for an individual who tests positive for COVID-19. Isolation keeps someone who is sick or tested positive for COVID-19 without symptoms away from others even in their own home.
- Close Contact is defined as any individual who was within 6 feet of an infected person, masked or unmasked, for at least 10 minutes starting from 2 days before the illness onset (or, for asymptomatic patients, 2 days prior to positive specimen collection) until the time the patient is isolated.
