Faculty Advisors: Dr. Mark Okrant and Dr. Thaddeus Guldbrandsen

This project involved working with Plymouth Parks and Recreation Department to develop a comprehensive map of the trail network in the park. Our goals constitute mapping Fox Pond Park in order to devise an extensive trail map, improving the ease of navigation throughout the park, and gaining permission from abutting property owners for the public display of the trail map. With these improvements and by increasing knowledge of park boundaries and trail networks, we hope to increase park usage.
