Plymouth State University completed its pre-semester COVID-19 testing for students, faculty, and staff on Tuesday, August 25, 2020. Since our testing program began, we have received COVID-19 test results for 4,262 members of our campus community.

These are the results as of today, Thursday, August 27, 2020:

18 people tested positive for COVID-19
- This number includes one staff member and 17 students

Among the 17 students who tested positive:
- Four are from out of state and did not come to New Hampshire based on these results
- 13 are from New Hampshire
- 7 of those students resided in the town of Plymouth
- No students living on campus tested positive

Note: Case numbers by town and county posted by the state of New Hampshire may be different than those included in our reporting. Positive cases for students living outside New Hampshire or in towns other than Plymouth would not appear in the local town or state case counts but would instead be counted as cases in their town or state of residence.
