COVID-19 Status and Summary

Wednesday September 30, 2020

Testing Results from Week of September 28, 2020 – Morning of September 30, 2020 at 8:15 AM
Number of tests performed this week: 2425
Results Received to Date: 844 (as of 8:15 AM on 9/30)
Total New Positive Cases: 1
Students: 0
Employees: 1
Results Pending: Ongoing
Total Active Cases: 1

Total New Positive Cases since Monday, September 28, 2020
Students: 0
Employees: 1

Quarantine and Isolation
Total Quarantining in New Hampshire: 19 (Including 1 travel quarantine)
Total Isolating in New Hampshire: 1
Total Isolating Outside of New Hampshire: 0
PSU Isolation/Quarantine Beds in Use: 4 (86 beds available)

Notes:

• An Active Case is defined as a person who is COVID-19 positive and is within their 10-day isolation period.
• Quarantine refers to the practice of separating individuals who have had close contact (see definition of close contact below) with someone with COVID-19 to determine if they develop symptoms or test positive for the disease. Quarantine lasts for a total of 14 days after the exposure has ended.
• Isolation is a term used for an individual who tests positive for COVID-19. Isolation keeps someone who is sick or tested positive for COVID-19 without symptoms away from others even in their own home.
• Close Contact is defined as any individual who was within 6 feet of an infected person, masked or unmasked, for at least 10 minutes starting from 2 days before the illness onset (or, for asymptomatic patients, 2 days prior to positive specimen collection) until the time the patient is isolated.
