TESTING
Results from Tuesday September 8, and Wednesday September 9, 2020

The majority of COVID-19 test results have been received following this week’s testing on Tuesday and Wednesday, September 8 & 9.

We continue to have an extremely low number of positive cases. As the remaining results are received they will be reported on the Plymouth website over the weekend.

These are the results of this week’s testing as of noon today:

Total Tests Performed:          Approximately 950
Results Received to Date:                 500

Total New Positive Cases:          1
    Students:            1
    Faculty/Staff:           0

Results Pending:           Approximately 390

Total Active Cases: 3

QUARANTINE & ISOLATION

Total Quarantining Locally (Possible Cases): 17
Total Isolating Locally (Positive Cases): 2
Total Isolating Outside Plymouth State (Positive Case): 1
PSU Isolation/Quarantine Beds in Use (83 beds available): 7

NOTES:

• An active case is defined as a person who is COVID-19 positive and is within their 10-day isolation period.

• Quarantine refers to the practice of separating individuals who have had close contact (see definition of close contact below) with someone with COVID-19 to determine if they develop symptoms or test positive for the disease. Quarantine lasts for a total of 14 days after the exposure has ended.

• Isolation is a term used for an individual who tests positive for COVID-19. Isolation keeps someone who is sick or tested positive for COVID-19 without symptoms away from others even in their own home.

• Close Contact is defined as any individual who was within 6 feet of an infected person, masked or unmasked, for at least 10 minutes starting from 2 days before the illness onset (or, for asymptomatic patients, 2 days prior to positive specimen collection) until the time the patient is isolated.
