PSU COVID-19 Status and Summary
Thursday, September 17, 2020

TESTING  Testing Results from Week of September 14, 2020

COVID-19 test results are being received from this week’s all campus testing. We continue to have an extremely low number of positive cases.

Total Tests Performed:  Approximately 3,500
Results Received to Date:  1,163
Total New Positive Cases:  0
  Students:  0
  Faculty/Staff:  0
Results Pending:  Approximately 2,300
Total Active Cases:  4

QUARANTINE & ISOLATION

Total Quarantining in New Hampshire:  46
Total Isolating in New Hampshire (positive cases):  3
Total Isolating Outside of New Hampshire (positive case):  1
PSU Isolation/Quarantine Beds in Use (75 beds available):  15

NOTES:
• An active case is defined as a person who is COVID-19 positive and is within their 10-day isolation period.
• Quarantine refers to the practice of separating individuals who have had close contact (see definition of close contact below) with someone with COVID-19 to determine if they develop symptoms or test positive for the disease. Quarantine lasts for a total of 14 days after the exposure has ended.
• Isolation is a term used for an individual who tests positive for COVID-19. Isolation keeps someone who is sick or tested positive for COVID-19 without symptoms away from others even in their own home.
• Close Contact is defined as any individual who was within 6 feet of an infected person, masked or unmasked, for at least 10 minutes starting from 2 days before the illness onset (or, for asymptomatic patients, 2 days prior to positive specimen collection) until the time the patient is isolated.
