Weekly testing continues through Wednesday September 23, 2020 – results expected beginning tomorrow and continuing throughout the week.

**Total Active Cases: 1**

QUARANTINE & ISOLATION

| Total Quarantining in New Hampshire: | 31 |
| Total Isolating in New Hampshire (positive cases): | 0 |
| Total Isolating Outside of New Hampshire (positive case) : | 1 |
| PSU Isolation/Quarantine Beds in Use (80 beds available) : | 10 |

NOTES:
- An active case is defined as a person who is COVID-19 positive and is within their 10- day isolation period.
- Quarantine refers to the practice of separating individuals who have had close contact (see definition of close contact below) with someone with COVID-19 to determine if they develop symptoms or test positive for the disease. Quarantine lasts for a total of 14 days after the exposure has ended.
- Isolation is a term used for an individual who tests positive for COVID-19. Isolation keeps someone who is sick or tested positive for COVID-19 without symptoms away from others even in their own home.
- Close Contact is defined as any individual who was within 6 feet of an infected person, masked or unmasked, for at least 10 minutes starting from 2 days before the illness onset (or, for asymptomatic patients, 2 days prior to positive specimen collection) until the time the patient is isolated.
