PSU COVID-19 Status and Summary
Monday, September 22, 2020

TESTING
Weekly testing ends today, Wednesday September 23, 2020.
Testing Results from Week of September 21–23, 2020

Number of tests performed this week: 2944 and ongoing
Results Received to Date: 822
Total New Positive Cases: 0
    Students: 0
    Employees: 0
Results Pending: Ongoing through Friday September 25, 2020

Total Active Cases: 1

QUARANTINE & ISOLATION

Total Quarantining in New Hampshire: 35
Total Isolating in New Hampshire (positive cases): 0
Total Isolating Outside of New Hampshire (positive case): 1
PSU Isolation/Quarantine Beds in Use (80 beds available): 10

NOTES:
• An active case is defined as a person who is COVID-19 positive and is within their 10-day isolation period.
• Quarantine refers to the practice of separating individuals who have had close contact (see definition of close contact below) with someone with COVID-19 to determine if they develop symptoms or test positive for the disease. Quarantine lasts for a total of 14 days after the exposure has ended.
• Isolation is a term used for an individual who tests positive for COVID-19. Isolation keeps someone who is sick or tested positive for COVID-19 without symptoms away from others even in their own home.
• Close Contact is defined as any individual who was within 6 feet of an infected person, masked or unmasked, for at least 10 minutes starting from 2 days before the illness onset (or, for asymptomatic patients, 2 days prior to positive specimen collection) until the time the patient is isolated.
